

ANATOMIC or KINEMATIC

We are so proud of our **latest software** release, it has a lot of enhancements!

Among others we have designed a dedicated procedure for kinematic alignment. **Fast easy and precise.**

Orthokey proudly designs and produces navigation system since 2005 in Florence, Italy. **Open platform, flexible and small sized.**

Our navigation system has software dedicated to navigation of total knee implants that enhances surgeon ability during all steps of the procedure, giving the fundamental tools to determine the best surgical approach. This is achieved with a reduced set of surgical instruments and a fast anatomical registration.
